

Robotics engineer with 10+ years at ABB, specializing in collaborative robots and software tooling. I lead technology innovation — shaping roadmaps, prototyping cobot solutions, and shipping production code in RAPID, JavaScript/TypeScript, and Python, including VS Code extensions on the Marketplace. I embed AI coding agents (Claude Code, GitHub Copilot) at every stage of development as a genuine force multiplier.

EXPERIENCE

Cobot Innovation & Technology Leader2025-04 – present

ABB Robotics, Sesto San Giovanni, Italy

- Drive technical strategy and product roadmap for the global cobot portfolio
- Shape adoption decisions for AI/coding agents across the team’s development workflow
- Rapid prototyping and POC of cobot solutions integrating RAPID, RWS 2, and external APIs
- Direct production-code contributions (RAPID, JavaScript/TypeScript, Python) and AI agent tooling

Cobot Specialist2020-01 – 2025-05

ABB Robotics, Sesto San Giovanni, Italy

- Local technical reference for ABB’s cobot portfolio (GoFa, YuMi, SWIFTI)
- Technologist supporting pre-sales, customer training, and international trade shows
- Developed EasyRecord: lead-through programming software for intuitive cobot trajectory recording — the technology behind landmark demos like YuMi conducting Andrea Bocelli
- Contributed to the OmniVance™ Collaborative Surface Finishing Cell: plug-and-play GoFa cell for sanding/polishing, cutting programming time by up to 90%
- Force control and EGM (Externally Guided Motion) integration for collaborative finishing applications

Cobot Product Engineering Specialist2018-02 – 2020-01

ABB Robotics, Sesto San Giovanni, Italy

- Collaborative robotics application development and deployment on YuMi and successor platforms
- Integration scouting, testing, and validation for new ecosystem products

Robotics Unit Technical Support Engineer2016-04 – 2018-02

ABB Robotics, Sesto San Giovanni, Italy

- Second-level technical support on IRC5 controllers, robot portfolio and HMI software
- Critical production issue resolution at general industry customers

Analyst2016-01 – 2016-02

Deloitte Consulting, Milan, Italy

Technical Development Specialist — Automation2015-07 – 2015-12

Barilla Group, Parma, Italy

- Industrial automation solutions in support of production lines

EDUCATION

Master's Degree in Automation Engineering

Politecnico di Milano2012–2015 · 100/110

Bachelor's Degree in Automation Engineering

Politecnico di Milano2009–2012 · 92/110

Erasmus Programme — Artificial Intelligence

University of Southampton (UK)2013–2013

PROJECTS

OmniVance™ Collaborative Surface Finishing Cell

Plug-and-play GoFa cell for automated sanding & polishing with integrated force control. Up to 90% less programming time.

EasyRecord

Conceived, designed, and built the lead-through programming software for intuitive cobot trajectory recording. Foundation of the YuMi/Bocelli orchestra demo (2017).

ABB Robotics — VS Code Extensions

Official Marketplace extensions for ABB Robotics — RAPID syntax, snippets, RobotStudio integration.
