

Robotics engineer with 10+ years at ABB, specializing in collaborative robots and software tooling. I lead technology innovation — shaping roadmaps, prototyping cobot solutions, and shipping production code in RAPID, TypeScript, and Rust, including VS Code extensions on the Marketplace. I embed AI coding agents (Claude Code, Copilot) at every stage of development as a genuine force multiplier.

EXPERIENCE

Cobot Innovation & Technology Leader
ABB Robotics, Sesto San Giovanni, Italy

2025-04 – present

- Drive technical strategy and product roadmap for the global cobot portfolio
- Shape adoption decisions for AI/coding agents across the team’s development workflow
- Rapid prototyping of cobot solutions integrating RAPID, RWS 2, and external APIs
- Direct production-code contributions (RAPID, TypeScript, Rust)

Cobot Specialist
ABB Robotics, Sesto San Giovanni, Italy

2020-01 – 2025-05

- Global technical reference for ABB’s cobot portfolio (GoFa, YuMi, SWIFTI)
- Technologist supporting pre-sales, customer training, and international trade shows
- Developed EasyRecord: lead-through programming software for intuitive cobot trajectory recording — the technology behind landmark demos like YuMi conducting Andrea Bocelli
- Contributed to the OmniVance™ Collaborative Surface Finishing Cell: plug-and-play GoFa cell for sanding/polishing, cutting programming time by up to 90%
- Force control and EGM (Externally Guided Motion) integration for collaborative finishing applications

Cobot Product Engineering Specialist
ABB Robotics, Sesto San Giovanni, Italy

2018-02 – 2020-01

- Product development and functional validation on the YuMi cobot line and successors
- Test plan definition and international rollout support for new firmware releases

Robotics Unit Technical Support Engineer
ABB Robotics, Sesto San Giovanni, Italy

2016-04 – 2018-02

- Second-level technical support on IRC5 controllers and the industrial robot portfolio
- Critical production issue resolution at automotive and general industry customers

Analyst
Deloitte Consulting, Milan, Italy

2016-01 – 2016-02

Technical Development Specialist — Automation
Barilla Group, Parma, Italy

2015-07 – 2015-12

- Industrial automation solutions in support of production lines

SKILLS

- Collaborative robotics
- Force control & finishing
- Lead-through / teach-by-demo
- AI adoption & coding agents
- Innovation strategy

ROBOTICS

- RAPID
- RobotStudio
- OmniCore
- RWS 2
- EGM
- Force Control
- ROS

AI_TOOLS

- Claude Code
- GitHub Copilot
- MCP

EDUCATION

Master's Degree in Automation Engineering
Politecnico di Milano

2012–2015 100/110

Bachelor's Degree in Automation Engineering
Politecnico di Milano

2009–2012 92/110

Erasmus Programme — Artificial Intelligence
University of Southampton (UK)

2013–2013

PROJECTS

OmniVance™ Collaborative Surface Finishing Cell
Cobot specialist contributor

Plug-and-play GoFa cell for automated sanding & polishing with integrated force control. Up to 90% less programming time.

EasyRecord
Developer

Lead-through programming for intuitive cobot trajectory recording. Foundation of the YuMi/ Bocelli orchestra demo (2017).

ABB Robotics — VS Code Extensions
Publisher / lead developer

Official Marketplace extensions for ABB Robotics — RAPID syntax, snippets, RobotStudio integration.

LANGUAGES

Italian native

English C1

BEYOND WORK

Founder & frontman

Gli Animali Fantastici del Sudamerica — Italian indie band. Songwriting, lead vocals, and live performance.

GitHub — the-water-robot

Personal projects and open-source tools around robotics, cobots, and development: desktop utilities, RWS experiments, automations.
